With artful prose, a strong sense of place, and attention to detail, I share stories that inspire and inform environmental stewardship and cultural connectivity.

Professional experience

St. Croix 360

Founder and editor

2011-present

Regular original reporting on numerous topics concerning the St. Croix River and its watershed, writing experiential historical, scientific, and recreational essays, and sourcing, editing, and publishing relevant news and stories from other sources. As of 2024, more than 4,500 people subscribe to the weekly email newsletter and approximately 360 people provide financial support each year. Stories have frequently been republished in other media or inspired coverage by other outlets.

St. Croix Watershed Research Station

Resident writer

2015-present

Communicating complex yet critical science in accessible yet accurate content. I regularly accompany scientists into the field to report on their research and work closely with them to craft articles and other media that share their findings and inform water policy and management.

Quetico-Superior Wilderness News

Writer

2013-2024

Weekly reporting on news and issues affecting the Boundary Waters region, including mining, ecology, historical research, management, and more.

Friends of the Boundary Waters Wilderness

Communications director

2008-2013

Wrote and produced print and email newsletters and many other publications, created communication strategies and campaigns, published two editions of chapbook of membership's essays.

Thomson Reuters

Corporate communications

2003-2008

Wrote internal communications content and technical documentation.

Freelance writing and communications

See clients and partners below

2005-present

Primarily writing on topics related to the environment, science, and art.
